Lipid profile

1) LDL cholesterol

LDL cholesterol = total cholesterol – (HDL cholesterol + VLDL cholesterol)

Formula no 13

a1=b1 - (c1+d1)

a1= LDL cholesterol

b1= total cholesterol

c1= HDL cholesterol

d1= VLDL cholesterol

2) VLDL cholesterol

VLDL cholesterol = Triglyceride / 5

Formula no 8

a1=b1/2.14

2.14 chya jagewar 5 karane constant madhun

a1= VLDL cholesterol

b1= Triglyceride

3) Non HDL cholesterol

Non HDL cholesterol= total cholesterol - HDL cholesterol

Formula no 3

a1= b1-c1

a1= Non HDL cholesterol

b1= total cholesterol

c1 = HDL cholesterol

4) LDL/ HDL RATIO

Formula no 4

a1= b1/c1

a1= LDL/ HDL RATIO

b1= VLDL cholesterol

c1= HDL cholesterol

5) Total cholesterol / HDL cholesterol

Formula no 4

a1=b1/c1

a1= Total cholesterol / HDL cholesterol

b= Total cholesterol

c1= HDL cholesterol
